Categories: For FOIA response

nHi Natalie,

I wanted to share some additional information with you regarding the Humphrey's compressor station. Attached you will find the business card of the company who did the testing at Non-Responsive home across the street from the station. The company along with MarkWest have told her that the 3 month air testing resulted in everything being normal and stated that there is nothing coming from the station that is making her sick. They both have refused to give her the results.

I have been told by my doctor that my liver is not functioning properly. The chemicals that were found in my air can harm the liver.

I am about to call Kristopher Weiss at OEPA to follow up with a previous conversation about issued violations at Humphreys station. Also, attached is my recent editorial regarding regulatory capture in Ohio..

Peace,

Non-Responsive

Dear Natalie,

I just forwarded info from Non-Responsive. I am talking with her now, and she will call you, but she said she has talked with you before.

Best,

Non-Resp

Non-Resp

I was actually on the phone with Non-Responsive when this message came through. Thank you for putting us in touch. I have asked Non-Responsive to send me copies of some documentation she states she has kept regarding the time and frequency of the problems she has observed. I emphasized to her the value of this kind of documentation, as nearby residents are the "eyes and ears on the ground." If you know of others who have kept similar logs of odors or health effects experienced, or are willing to keep logs going forward, please also put them in touch with me.

Feel free to give me a call if you would like to discuss further.

Thanks,

Natalie

Subject: Fwd: Crum Compressor Station

Dear Ms. Topinka,

Per the attached letter received from the USEPA regarding complaints of fracking-related pollution, I am forwarding another complaint received from the non-responsive who live near an Antero frack pad and connected compressor station. Between these two operations, they have experienced health effects including fatigue, nausea and jitters. They have actually had to leave home and purchase another property to feel better but have grandchildren and an elderly parent they have to return to help care for. I have witnessed their frustration, and even fear, and tried to help through the OEPA with a verified complaint (still unresolved) and the ODH (no followup from them).

We are hoping you will help. [Non-Responsive] will be contacting you shortly. I have copied her in. Her phone number is [Non-Responsive] Thank you.

Best,

Lea Harper

At 4:30 AM my house was shaking and a giant fireball that lit up the whole ridge top was observed! It looked like the Crum Compressor station was on fire!!! This AM, my gamma scout radiation detector, is showing elevated gamma!!! We don't feel safe in our home!! What is going on? Last week my house vibrated most nights. Please help us, we need answers!!!
